un sogno divenuto realtà

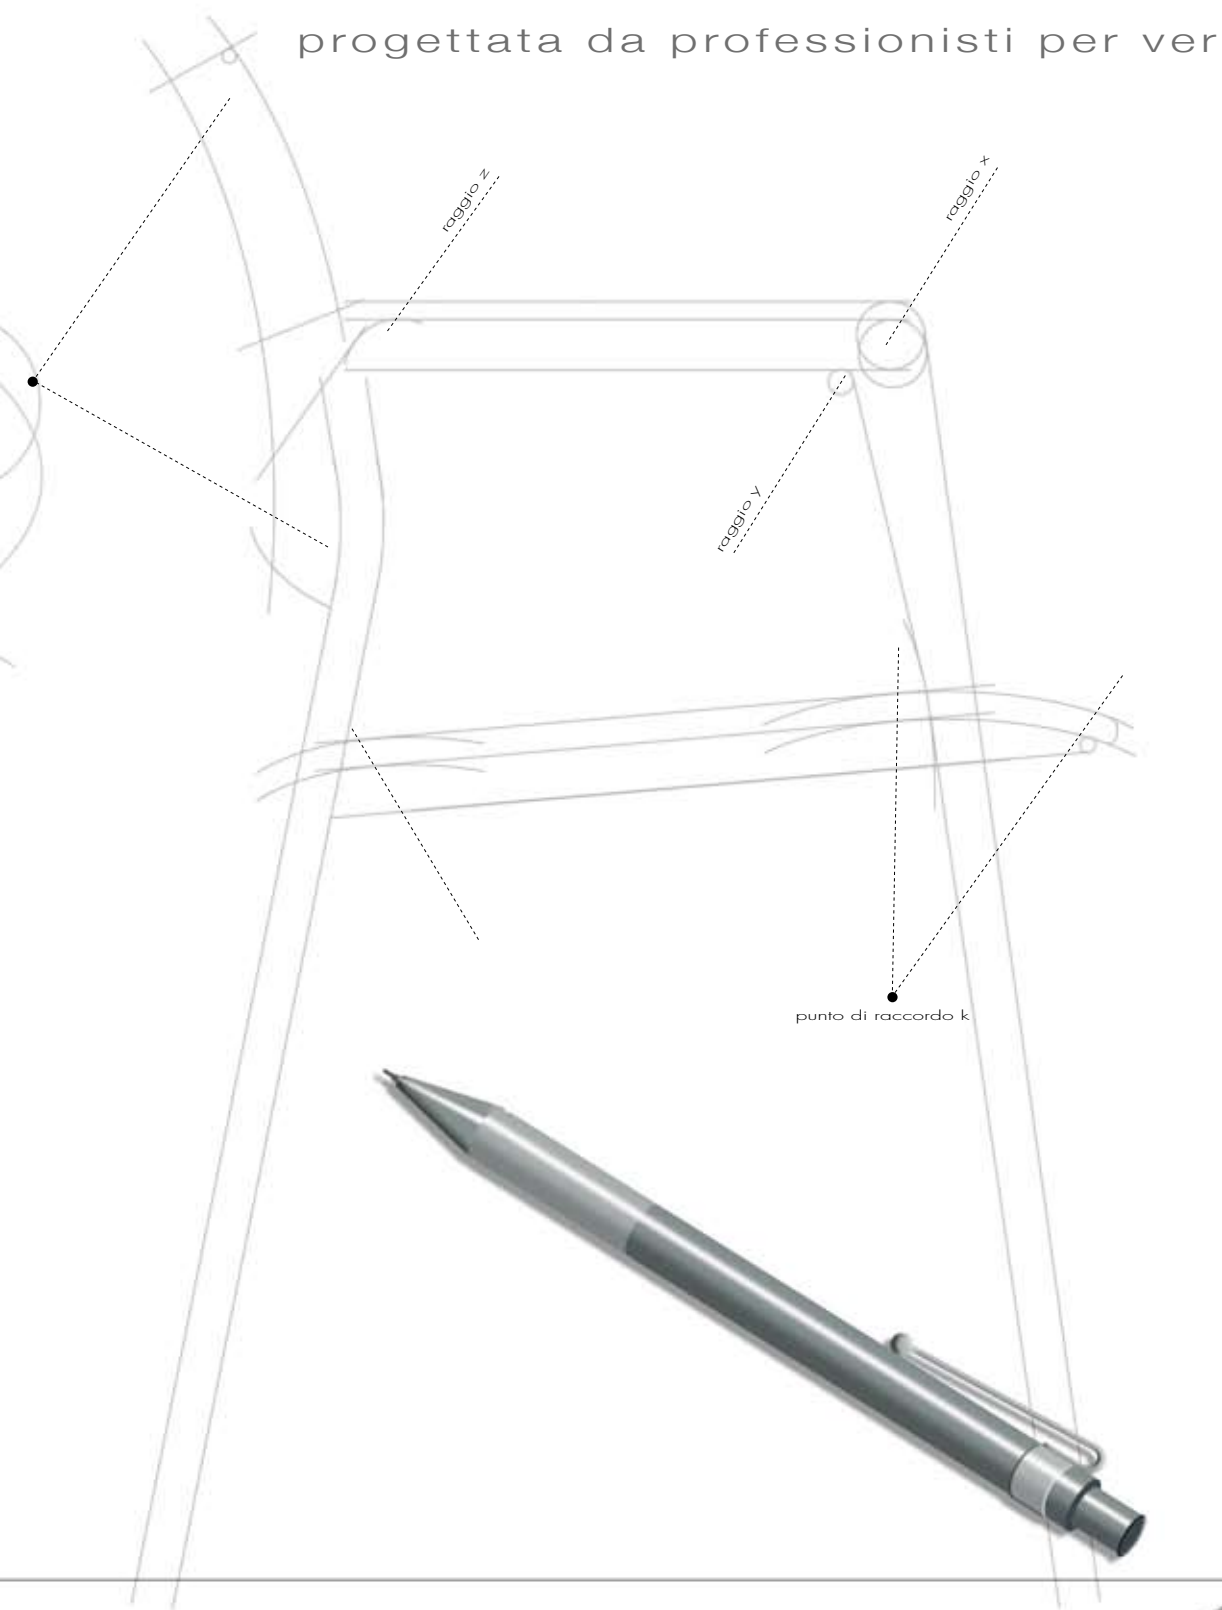

designers: Angelo Pinaffo - Paolo Scagnellato

Dream is the fruit of Cerantola's years of experience in the sector of chairs for waiting rooms and conference rooms and of the creative ability of qualified and valid designers who have designed a chair with personality, marked by its formal clean line, sophistication and elegance. Production technologies and the use of state-of-the-art materials have led to reaching the perfect balance between comfort, robustness, functionality, and design. Technologically advanced studies have made Dream so robust that it has passed all strength tests foreseen by European norms. Simple and elegant design make Dream versatile and fit for any environment: waiting rooms, conference rooms, and contract and home offices.

progettata da professionisti per veri intenditori

Dream is available in a vast range of colors and in three types of materials (leather, wood and plastic.

The structures are produced in different versions: with armrests or without, on four legs, with wheels, sliding, bench, with or without the desk.

Features such as being able to easily stack the chairs on top of each other and accessories such as the writing desk, the joint coupler and the transport cart make it a functional product which can satisfy every type of request in any area. The anatomical seat and back assure comfort and are ideal for long periods of use.

dream

PLASTICA

Dream has been outfitted with a convenient cart to transport the stacked chairs. The cart is type approved for transporting a maximum of 15 stacked chairs.

dream

The Dream armrests can be assembled on all 4 versions (wood, leather, colored plastic and upholstered) and they can be outfitted with desks on the right or left. Finally, Dream can also be stacked with the armrests and with the armrests and desk.

dream

Dream is equipped with couplers to join the chairs together laterally. The Dream couplers have different characteristics: the first is that the couplers come out of the seat of the chair and are retractable, therefore the chair can be used with the couplers or without, by simply removing or inserting the coupler. Another characteristic of the Dream coupler is the possibility of joining the chairs without the armrests, with the armrests and with the armrests and the desk, thanks to the two different coupler sizes which the client can request when placing an order, thus optimizing the space occupied by the chairs.

The joint coupler is not available for the wooden Dream and leather Dream versions.
